

ABDELRAHMAN MOHAMED

Full-Stack Software Engineer | AI & Computer Vision

Ankara, Türkiye - Open to hybrid / remote / relocation

abdoessammo@gmail.com · +90 552 750 82 02 · abdo.kolaytec.com · github.com/Abdoessam0 · linkedin.com/in/abdo-mo

PROFESSIONAL SUMMARY

Full-stack software engineer focused on turning real business workflows into reliable digital products. Builds clean web interfaces, secure API workflows, database-backed dashboards, mobile flows, and AI/computer-vision prototypes. Passionate about clean UX, stable releases, secure data handling, and learning from strong engineering teams. Looking for a software engineering or full-stack role to contribute to production features and grow in modern web, cloud, and AI-enabled software.

TECHNICAL SKILLS

Frontend	React, Next.js 14/15, TypeScript, JavaScript, Tailwind CSS, React Query, Redux Toolkit, HTML, CSS, Alpine.js
Backend / APIs	Node.js, Express.js, PHP, Laravel, REST APIs, authentication, JWT, role-based access, PDF generation, Java basics
Databases	MySQL, PostgreSQL/Supabase, MongoDB, SQL Server, schema design, T-SQL procedures, triggers, views
AI / Vision	Python, YOLOv8, PyTorch, OpenCV, Streamlit, real-time detection UI, FPS/confidence analytics
Tools	Git, GitHub, GitHub Actions, CI/CD, Vercel, cPanel, Linux, Docker basics, Postman, Figma, debugging

WORK EXPERIENCE

Software Engineering Intern (İME) · Feinsoft · Ankara, Türkiye · 2026 · 4 months

- Worked on real software projects during a long-term professional internship, contributing to web interfaces, admin-panel features, and client-driven flows.
- Implemented and improved database-backed workflows, REST API thinking, and admin-facing product features based on real requirements.
- Practiced debugging, testing, deployment checks, reading existing code, and working inside a professional development team.

Software Developer Intern (Erasmus+) · RE/MAX Wise · Lisbon, Portugal · Sep 2025 - Nov 2025

- Built and maintained 3 live real-estate platforms used in production during the Erasmus+ software internship.
- Improved reusable components, shared layouts, SEO-safe routing, metadata, canonical/noindex handling, and internal linking.
- Resolved build, accessibility, environment, and deployment issues while testing live production releases.

Technical Support Engineer · AFAQY · Riyadh, Saudi Arabia · Jul 2024 - Sep 2024

- Supported fleet operations for 650+ GPS-tracked vehicles and diagnosed live platform, device, and data issues.
- Built dashboard and reporting workflows that reduced manual Excel-based operational work.
- Delivered client training, technical documentation, and handovers for both technical and non-technical users.

WordPress Developer Intern · NFS Soft · Erzurum, Türkiye · Sep 2022 - Jun 2023

- Built multilingual client websites using WordPress, PHP customizations, responsive templates, and cPanel hosting.
- Improved mobile responsiveness, accessibility, page performance, and maintenance quality across live client projects.

SELECTED PROJECTS

BELS Digital Application System · Full-stack admissions platform

School admissions system for a real institution with active users.

- Built student authentication, multi-step forms, grade entry, uploads, PDF entrance cards, status tracking, and admin management.
- Implemented API-based workflows, validation, role-based access, Excel export, and operational admin flows.

Tech: Next.js, TypeScript, Tailwind CSS, PHP, MySQL, REST APIs, PDF generation

ErzurumŞikayet - Civic Complaint Platform · Full-stack production platform

City complaint and business review platform serving users, companies, and administrators.

- Built user, company, and admin dashboards with complaint workflows, company registration, category filters, and statistics.
- Handled database design, backend logic, frontend UI, deployment, GitHub tracking, and production fixes.

Tech: Laravel, PHP, MySQL, Tailwind CSS, Alpine.js, cPanel

YOLOv8 Real-Time Object Detection System · AI / Computer Vision

Real-time detection prototype with a live UI and analytics.

- Built live detection interface, camera workflow, FPS/confidence analytics, model testing, and dataset-ready structure.
- Prepared the project for future cloud/mobile integration and performance tuning.

Tech: Python, YOLOv8, PyTorch, OpenCV, Streamlit

Campus Safety App · Mobile team project

Cross-platform safety app built with a 3-person team.

- Built emergency alerts, real-time incident reporting, interactive campus map, and admin safety dashboards.
- Contributed to mobile-first UX, cross-platform implementation, and team engineering decisions.

Tech: React Native, Expo, TypeScript, Expo Router, Supabase

Additional Engineering Projects · Full-stack, desktop, and database systems

- **EventSys:** built authentication, ticketing, live weather integration, discovery, admin panel, JWT/MongoDB workflows, and FE/BE deployment.
- **Library Management System:** built a C# desktop automation system with SQL Server procedures, triggers, functions, views, and reporting.

Tech: React, Node.js, Express.js, MongoDB, JWT, C#, SQL Server, T-SQL

EDUCATION, CERTIFICATIONS & LANGUAGES

Education

B.Sc. Computer Engineering - Atatürk University, Türkiye
- Graduated Jun 2026
Full-Stack Software Engineer Diploma - ALX - Oct 2023 to Nov 2024

Certifications & Languages

ALX Full-Stack Diploma · VTest English C1.1 · Rosetta Stone English C1
Arabic native · English C1 certified · Turkish C1

International Experience: Erasmus+ Youth Summer Fest facilitator in Romania; FIS Snowboardcross World Cup English/Turkish volunteer translator in Erzurum.
